Inputs
challenge files, METAR, OSM, ADS-B, EUROCONTROL aggregates
Features
label-free: clocks, load, weather, stand history, ADS-B, record ordering
Copy classifier
P(off-block is the schedule)
11 regressors
physical taxi time, blended by NNLS
Mixture
p · (MVT − SCHED) + (1 − p) · taxi
Rules chain
delayed-row gate, plan cliff, LIRF regimes, clock rules, plan-window clip
Stackers
month-complete: ADS-B tracks, member disagreement, departure stream
Record tail
LIRF copy classifier, near-schedule rule, daily delay calibration, duplicated records
Bundle and post-steps
stream-transformer inputs, four post-steps, then the plan-window clip
final prediction
